

Meet the Sycamore Ridge ESC Teachers

When you contribute to the DMSEF, you are helping to provide your children with an enriched, well rounded education.

Sambat Ung, ESC Science Teacher

“Through experience and discovery students are able to make hands on connection with the classroom curriculum”. Ms. Ung works with our budding scientists on activities ranging from discovering air pressure through blowing up marshmallows to meal worm races, weather pinwheels and building volcanoes.

Jennifer Oliveira, ESC Technology Teacher

Students utilize technology to become lifelong learners and to improve student performance in all areas of the curriculum through integrated project-based learning. Classroom teachers and Mrs. Oliveras, the technology teacher, collaborate to create technology projects that reflect an understanding of the grade level curriculum, as well as the ability to use technology to research, communicate, and problem solve.

Catherine Gilbert, ESC Art Teacher

In the Sycamore Ridge art program taught by Ms. Gilbert, students learn the elements and principles of design that help them to create art. Art knowledge is acquired as the elements and principles of design are revisited time and again in the context of different assignments. Assignments are aligned with grade level curriculum and the global village theme.

Erin Zoumaras, ESC Music Teacher

In music class, Ms. Zoumaras encourages all students to express themselves musically by singing, rhythm workshop creations and playing instruments. Students apply their musical expressions to classroom activities and grade level performances. Fourth, Fifth and sixth grade students have an opportunity to extend their musical knowledge by learning a band instrument in the after-school Stallion Beginning Band or Stallion Advanced Band.

Janel Wells, ESC Physical Education Teacher

Coach Wells provides opportunities for students of all abilities to be successful, while instilling a love for physical activity that will last a lifetime. She promotes an understanding and an appreciation for the benefits of lifelong physical activity, healthy habits and positive choices. Students are taught positive behaviors, values and attitudes along with sportsmanship, teamwork and self discipline in a safe and meaningful way, all while meeting the California physical education standards.

ESC teacher's salaries are supported through your contributions. **Contribute today!**

To contribute on-line visit www.delmarkids.org. The ESC program is staffed by credentialed instructors in the areas of PE, Art, Music, Technology and Science.
